

Noah Boone

AI Consultant

Location: Utah, USA | Email: Noahbooner@gmail.com | LinkedIn: noah-boone78 | GitHub: noahboone-market

Professional Summary

Technical, growth-focused engineer combining a foundation in business analysis with hands-on experience building systems that scale. Proven track record at Domo and Bateman executing high-velocity projects, integrating platforms, and leveraging AI models to accelerate routine development tasks. Focused on shipping stable, functional automations that enrich lead data, streamline GTM workflows, and provide an operational edge.

Skills & Technologies

- **Engineering & Protocol:** Node.js, Claude Code Certified, HTML/CSS.
- **AI-Assisted Development:** Expert in leveraging Claude Code to execute local workflows, integrating custom agent skills for rapid prototyping and deployment using Model Context Protocol (MCP).
- **Systems & Operations:** Claude Code, Domo, Salesforce, HubSpot, Apollo.io, ClickUp, Zapier (Advanced).
- **Data Literacy:** SQL basics, A/B testing implementation, KPI tracking, Regression Analysis.

Professional Experience

Domo | Utah

AI Marketing Intern & AI Solutions (Dec 2025 – Present)

- Assisting in the development of Domo's AI Outbound Engine using Google Gemini Enterprise to replace manual SDR tasks with intelligent workflows.
- Setting up agentic automations leveraging the Model Context Protocol (MCP) to enrich lead data and handle CRM routing.
- Collaborating with Sales Operations to educate ICs on new Apollo.io sequences, enabling the wider team to securely adopt automated workflows.
- Leveraging Claude Code, integrated with custom codebase skills, to radically accelerate the prototyping of internal utilities and dynamic tracking tools.

Bateman Collective | Lehi, Utah

BDR & Digital Marketing Integrations Intern (Dec 2024 – Dec 2025)

- Managed cross-platform data integrations across Zapier and ClickUp to replace legacy manual entry tasks with reliable, stable automations.
- Deployed A/B tests and iterated on marketing funnels based on performance data, contributing to a 30% boost in conversion rates.
- Acted as a technical bridge, gathering requirements during client discovery calls to construct robust CRM logic and improve retention by 15%.
- Maintained ownership over API synchronization reliability between disparate marketing and sales

tools.

ProStar / Volunteer Representative | USA & Argentina

Leasing Specialist & Leader (2021 – 2025)

- Teamed up to build an LLM-chatbot internally (CS-339R course), ensuring clean and readable functionality.
- Engineered compliance tracking tools resulting in a 20% reduction in contract errors.
- Trained and managed 100+ volunteer representatives internationally in fluent Spanish.

Proof of Work & Live Projects

- **Jarvis Journal (jarvisjournal.com):** Built and shipped a live autonomous web publishing application. Used Python/Node scripting and AI development tools to pull daily news, format content, and deploy updates via GitHub.
- **Interactive Knowledge Graph (noahboone.com):** Built a custom interactive skills platform using HTML canvas and Force-graph to visually map technical skills to GTM outcomes, demonstrating clean frontend ability.
- **AI Banner Generator Plugin:** Developed a functional Figma plugin intersecting custom design tools and the Google Gemini API to generate visual components natively.
- **AI Outbound Scripts:** Engineered automated scoring workflows that pass prospects between Zapier logic hurdles and human-in-the-loop sales reps.

Education

Utah Valley University (UVU) | B.S. Business & Analysis, Class of 2025
